OBJECTIVE

Currently seeking entry-level opportunities as a Web Developer, Software Developer, Software Engineer, Cloud Application Developer, Cloud Engineer, Game Developer, or similar position. My goal is to continue expanding my skill set while working with the most talented and innovative developers.

PROFESSIONAL SUMMARY

Results-oriented disabled Navy veteran with a Secret security clearance and six years of leadership experience. Skilled in cloud application development with expertise in Java, JavaScript, and Python, leveraging AWS and Azure. Currently enrolled in the Washington Vets to Tech program (WaV2T), specializing in Cloud Application Development. Upon completion, this program contributes 18 credits towards a bachelors degree in computer science Seeking an entry-level position to apply my technical skills, collaborate with talented developers, and contribute to innovative solutions. Strong communication, problem-solving, and adaptability skills complement my ability to design, build, and deploy scalable and secure cloud-based applications.
